The new Share for Review feature in Photoshop (beta) allows designers to edit in Photoshop and perform peer review from within the program by sending files to a Review server. The files sent remain secure because they are in the cloud on Adobe's servers. The sender is able to look at other reviews before making changes and can see an updated version of the file that is then sent back to the designer after changes are made. A two-factor authentication enables only one person or device to access a Review. While the feature is new, Adobe plans to expand it considerably over the next 12 months.
